1 Data Preparation

1.1 Merging consumption and customers info datasets

1.2 Rates Graphs

1.2.1 Figure 2: Cosy Rate by Period

1.2.2 Figure A.16: Rates by Rate Period and GSP Group as of 01 June 2024

1.2.3 Figure A.17: Rates Over Time

1.2.4 Figure A.18: Rates as Share of Typical Marginal Price Over Time

1.3 Summary Statistics Tables and Graphs

1.3.1 Figure 3: Weekly Adoption of the Cosy tariff

1.4 Availability of smart meter data

1.4.1 Figure A.19: Smart Meter Data Availability for Cosy Adopters

1.5 External Validity Tables

2 Empirical Analysis

2.1 TWFE Heterogeneity Analysis

2.1.1 Table A.9: Cosy Adoption on Electricity Consumption Controlling for EV Charging

2.1.2 Table 3: Cosy Adoption on Probability of Charging EV by Period

2.1.3 Table A.10: Impact of Cosy for Leavers

2.1.4 Table A.11: Impact of Cosy by LCTs Ownership

2.1.5 Pre-trends checks

2.1.6 Figure 11: Impact of Cosy by Outside Temperature

2.2 Moderators

2.2.1 Table A.12: Cosy Adoption by Previous Tariff Type

2.2.2 Figure A.29: Impact of Cosy Adoption by EAC on Consumption and Figure A.30: Impact of Cosy Adoption by EAC on Share of Consumption

2.2.3 Figure A.28: Impact of Cosy Adoption by EPC Score on Consumption

2.2.4 Figure A.33: Impact of Cosy Adoption by Heat Loss on Consumption and Figure A.34: Impact of Cosy Adoption by Heat Loss on Share of Consumption

2.2.5 Figure A.31: Impact of Cosy Adoption by Floor Area on Consumption and Figure A.32: Impact of Cosy Adoption by Floor Area on Share of Consumption

2.2.6 Property values

2.2.7 Figure A.36: Impact of Cosy by Region
